

Numeracy Puzzle of the Week

If you wrote down all the integers from 1 to 100 (including 1 and 100) how many times would you see the digit 1?

Numeracy Puzzle of the Week

21 times

1

10

11

12, 13, 14, 15, 16, 17, 18, 19

21, 31, 41, 51, 61, 71, 81, 91

100

Numeracy Puzzle of the Week

Numeracy Puzzle of the Week

Can you move one digit in the calculation below to make a true statement?

$$110 - 102 = 10$$

Numeracy Puzzle of the Week

Move the 2 up to make it a power

$$110 - 10^2 = 10$$
